Honors Curriculum

Honors curriculum goes beyond the grade level standards and is enriched and advanced. Students are not given more work, but more rigorous work that challenges them to analyze, evaluate, and synthesize new information.

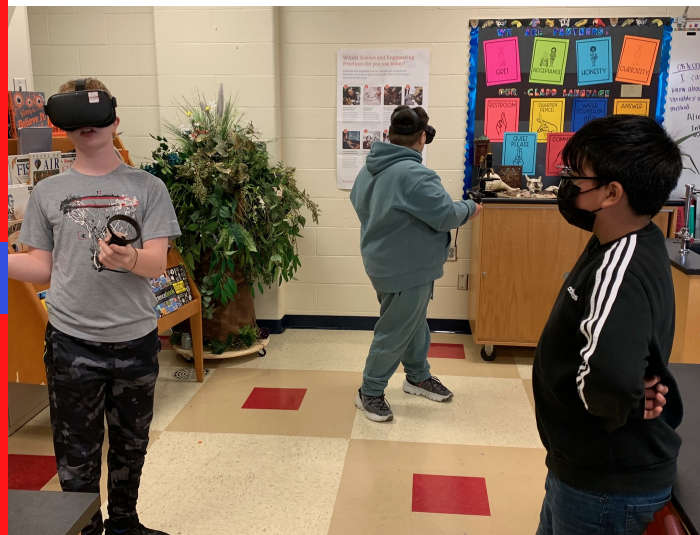

The English/language arts curriculum is expanded with the Indiana Department of Education High Ability Units of Study for each grade level.

Honors math students can take Algebra I as an 8th grader for high school credit.

Spanish I is offered to 8th graders for high school credit as well as Preparing for College and Careers.

Students in Mrs. Williams' Honors Science class at SMS explore virtual reality.

Other Program Benefits

Guidance and Counseling

Guidance Counselors are available to help with the social and emotional needs of high ability learners and to assist in applying for Early College and 21st Century Scholars programs.

Fine Arts

Honors band and choir are offered for 7th and 8th graders who excel in music.
